Key Projects

Coffee Shop POS & Inventory Management System
(Laravel | MySQL | REST API | Dashboard System)

- Developed a web-based POS and management dashboard for a coffee shop business with a central kitchen and three branch locations.
- Built cashier and order management features, including sales transactions, customer accounts, and order processing.
- Build inventory management functionality with stock tracking and inventory transfers between branches and the central kitchen.
- Implemented an order routing system to automatically send menu orders to the appropriate departments, including hot kitchen and cold kitchen sections.
- Enhanced customer loyalty features including gift card wallet management and reward point tracking.
- Created sales, inventory, and customer reporting modules with dashboard analytics for monitoring business performance.

HtaWaRa – Mobile Application Content Management System
(Larave MySQL | REST API | CMS)

- Developed an administrative dashboard for managing content and operations of the HtaWaRa mobile application.
- Built content management modules for managing articles, videos, and other mobile application resources.
- Adding module for user management, reporting, and administrative features for efficient platform management.
- Integrated the dashboard with the mobile application through RESTful APIs with secure token-based authentication.
- Enhanced dashboard features to support content updates and improve application operations.
- Reporting dashboards to track user registrations, user activity, and application engagement.
